안하일 4:23 PM

교수님 저희 지금 케이블 사러 직접 안산역 안산유통상가에 가는중입니다. 그래서 필요한 팀 만큼 한 번에 사려고 하는데 괜찮을까요...??

Thursday, October 31st

PinkWink_korea 4:24 PM

괜찮은데 돈 집행을 어떻게?

안하일 4:24 PM

수업 차원에서 재정 지원이 가능하다면

저희가 결제하고 영수증을 첨부해도 될까요??

PinkWink_korea 4:25 PM

아니

행정실에. 물어야할듯

안하일 4:26 PM

아.. 그럼 저희 팀 차원에서 따로 구매하는 것으로 하겠습니다.

PinkWink_korea 4:27 PM

카드빌렸엉

오세요

YOLO V3

■ README.md

라즈베리파이제로(RPI)에서 파이카메라 영상 스트리밍하기

개요

왜 만드는가?(WHY)

Zumi 플랫폼은 라즈베리파이제로(이하 RPI)를 메인 컴퓨터로 사용합니다. 그리고 팀의 목표에 따라 자율주행을 구현하기 위해 영상을 사용하기로 했습니다. 우리는 사람과 몇 가지 물체를 인식하기 위해서 YOLO를 사용하기로 결정했고 RPI의 컴퓨팅 파 워로 제대로된 성능을 기대할 수 없기 때문에 다른 컴퓨터에 RPI의 영상을 스트리밍하게 되었습니다.

무슨 기능인가?(WHAT)

RPI에서 장착되어있는 파이카메라의 프레임을 ROS를 이용해 sensor_msgs.msg/lmage.msg 형태의 토픽을 publish합니다.

어떻게 작동하는가?(HOW)

Github 홈페이지에서 코드별로 설명이 나와있습니다. 그것을 참고해주세요.

코드 분석(picam2.py)

25번줄까진 초기 세팅 작업입니다. 주석을 참고해주세요.

29. cap = cv2.VideoCapture('/dev/video0')
